

BRAINTREE ENGAGE

Putting people first. Identify and respond to the Covid-19 risks by monitoring, communicating and staying compliant.

braintree

A  Company

AN INNOVATIVE SOLUTION FOR EVOLVING BUSINESSES

Whether your employees are office-bound, working remotely, or alternating between the two, Braintree Engage will allow you to stay agile and maintain control in an ever-changing work environment. Built on the Microsoft PowerApps platform, a low code platform that accelerates business operations, the Engage app allows every employee to effectively communicate their work location and health status

from a single application. When they want to work at the office, staff can book a desk and have their temperature recorded upon arrival. The Engage app also provides additional features to make hybrid working that much easier for all involved. Braintree Engage is powered by the full breadth and depth of Microsoft 365 apps experienced through Microsoft Teams.

WHY YOU WILL LOVE BRAINTREE ENGAGE

Risk Questionnaire

Indicates if an employee might have been exposed to possible Covid-19 risk situations e.g. Contact with a Covid-19 Positive person, Travel outside the borders of the country, tested positive for Covid-19, visited a facility where Covid-19 is treated.

Compliance and Governance

The Engage app is compliant with the South African Covid-19 reporting regulations on symptom screening, return to work policies, positive cases, and worker vulnerability tracking.

My Location

This allows the employee to select where they will be working from, either for a specific day or multiple days in advance. Employees verify whether they are:

- Working at the office, at home, are on site or travelling.
- Have taken annual or sick leave.

Health Check-In

Allows for the completion of a health-related questionnaire that is used to manage various health risks in the company. The questionnaire can be customised based on compliance and governance regulations.

Vulnerable Worker Tracking

Provides a detailed checklist to monitor the health and safety of employees who spend many hours on the road or in multiple locations – and can be turned on and off as needed. The requirements are customisable, and managers can receive reports and notifications.

Return to Work

Tracks information after isolation, positive testing, hospitalization; admission and outcome date and results.

Covid-19 Declaration

Should an employee test positive for Covid-19, they can safely inform HR and manage their status and exposure via this functionality.

Company News

Offers an easy way to keep employees informed with updated company policies and procedures and to implement any changes made.

Reporting and Dashboards

Include built-in reports and dashboards for incident notifications, late check-ins, employee symptom and diagnosis tracking, building capacity tracking and booking usage reports.

ADDITIONAL FEATURES

Because we understand every business is unique and has different employee requirements, the Engage app includes additional features to allow you to customise it to suit your needs.

In situations where an employee may have tested positive for Covid-19, the Contact Tracing feature will allow you to safely screen and test any employees they may have come into contact with, thereby reducing the risk of spread further. The Covid-19 Tracker also provides users with a detailed list of active cases, fatalities, and the rollout of vaccinations across the country.

Sharing informative videos can be done quickly and easy from your company's Microsoft Stream app. Videos can be placed in groups, allowing you to add multiple videos per group. There's also the option of including RSS Feeds to allow everyone to stay up to date with the latest news from trusted sources while on the go.

Engage is accessible from any connected device - meaning your employees can access the app from wherever they are in the country via laptop, tablet or smartphone. Two-way communication can also be enabled via USSD and SMS gateways using the app's Communicate function.

WHAT BRAINTREE ENGAGE CLIENTS HAVE TO SAY

"Thank you to the Braintree team for working tirelessly to get our COVID 19 screening App and USSD tool functional and customised for our business, which has made a huge improvement to our on site screening process and reduced the need for human resources to facilitate this process on campus. The Braintree team was always available to assist and quick to respond to any queries."

Pamela Talma
HR Team: Manager at OUTsurace

"I thank you for the opportunity to be able to express our gratitude and experience with the Engage Application. We are able to brief our Directors on a daily basis at a click of a button and provide them with exactly which of the staff are in office, which members are off ill and with what exactly they are ill with. This has certainly made our daunting task of keeping everyone as safe as possible a lot easier to manage. We extend our appreciation and recommendations to those that wish to make use of this application, its affordable too."

Alexsa Da Costa: Office Manager
at Barnard Incorporated

"Engage is a great application that has provided us with the necessary monitoring tools to stay in touch with the well-being of our staff and where they are working from. During a time where work from home is the new normal, having an app that connects all our staff members and allows a single view for managers to stay abreast of their team from a logistical and health perspective has been very helpful."

Kudzai Mapfinya:
Technical Support
Manager at Everlytic

"This SaaS product was able to simply be provisioned with minimal data input and management overhead, allowing Frogfoot to keep focus on its core business and not lose momentum with its service delivery and network operations. Frogfoot would openly refer Braintree Engage to any organisation as it allows business leaders to maintain focus on their core business and complement any compliance initiative efficiently and in a scalable manner."

Enzio von Diest
IS & IT Manager at Frogfoot

"As a leading South African telecommunication provider, Vox Telecom needs to be as predictive and proactive in our decision-making process as possible, to preserve business continuity and build company resilience. For me Braintree Engage is evolving into more than a crisis management application, it has provided us with the governance needed to manage our people through this crisis and has the potential to become a key collaborative communication tool allowing for greater transparency and open two-way communication."

Tim Wood
Executive Head of IS & IT at Vox
