# Azure

Embrace the Azure Cloud

Azure is Microsoft's complete Cloud platform, which can host your existing applications and streamline new application development- it can even enhance on-premises applications. Azure integrates the Cloud services you require to develop, test, deploy, and manage your business applications, all the while taking advantage of the efficiencies and possibilities of Cloud computing.

By hosting your applications in Azure, you can start small and easily scale your application as your customer demand grows. Azure offers reliability that's needed for high-availability applications, even including failover between different regions.

## Mastery of the Cloud

At Braintree, we will introduce your organisation to the full benefits of the services available in Microsoft Azure – ranging from Archive Storage (extend your on-premise Backup, Storage and Data Archiving Solutions to the Cloud) to Linux or Windows Virtual Machines (on-demand, scalable computing resources). Our team of experts will keep you updated on your business' consumption and subscriptions thanks to the Azure Portal, which lets us easily manage all your Azure services.

It's crucial to not only know who is using your applications, but also to prevent unauthorised access to your resources. Azure provides you with the Azure Active Directory (Azure AD) which is a Microsoft multitenant, Cloud-based identity and access management service. You can add single-sign on (SSO) to your applications by integrating with Azure AD.

## Why You Will LOVE Azure

### AGILITY AND UPTIME

Scale your computing power to meet Data and bandwidth demands while enjoying faster provisioning. A financially-backed 99.99% uptime guarantee.

### SECURITY

Help protect your business assets and Data against evolving threats with built-in multilayered security and intelligent threat protection.
