

AI Jumpstart by Braintree

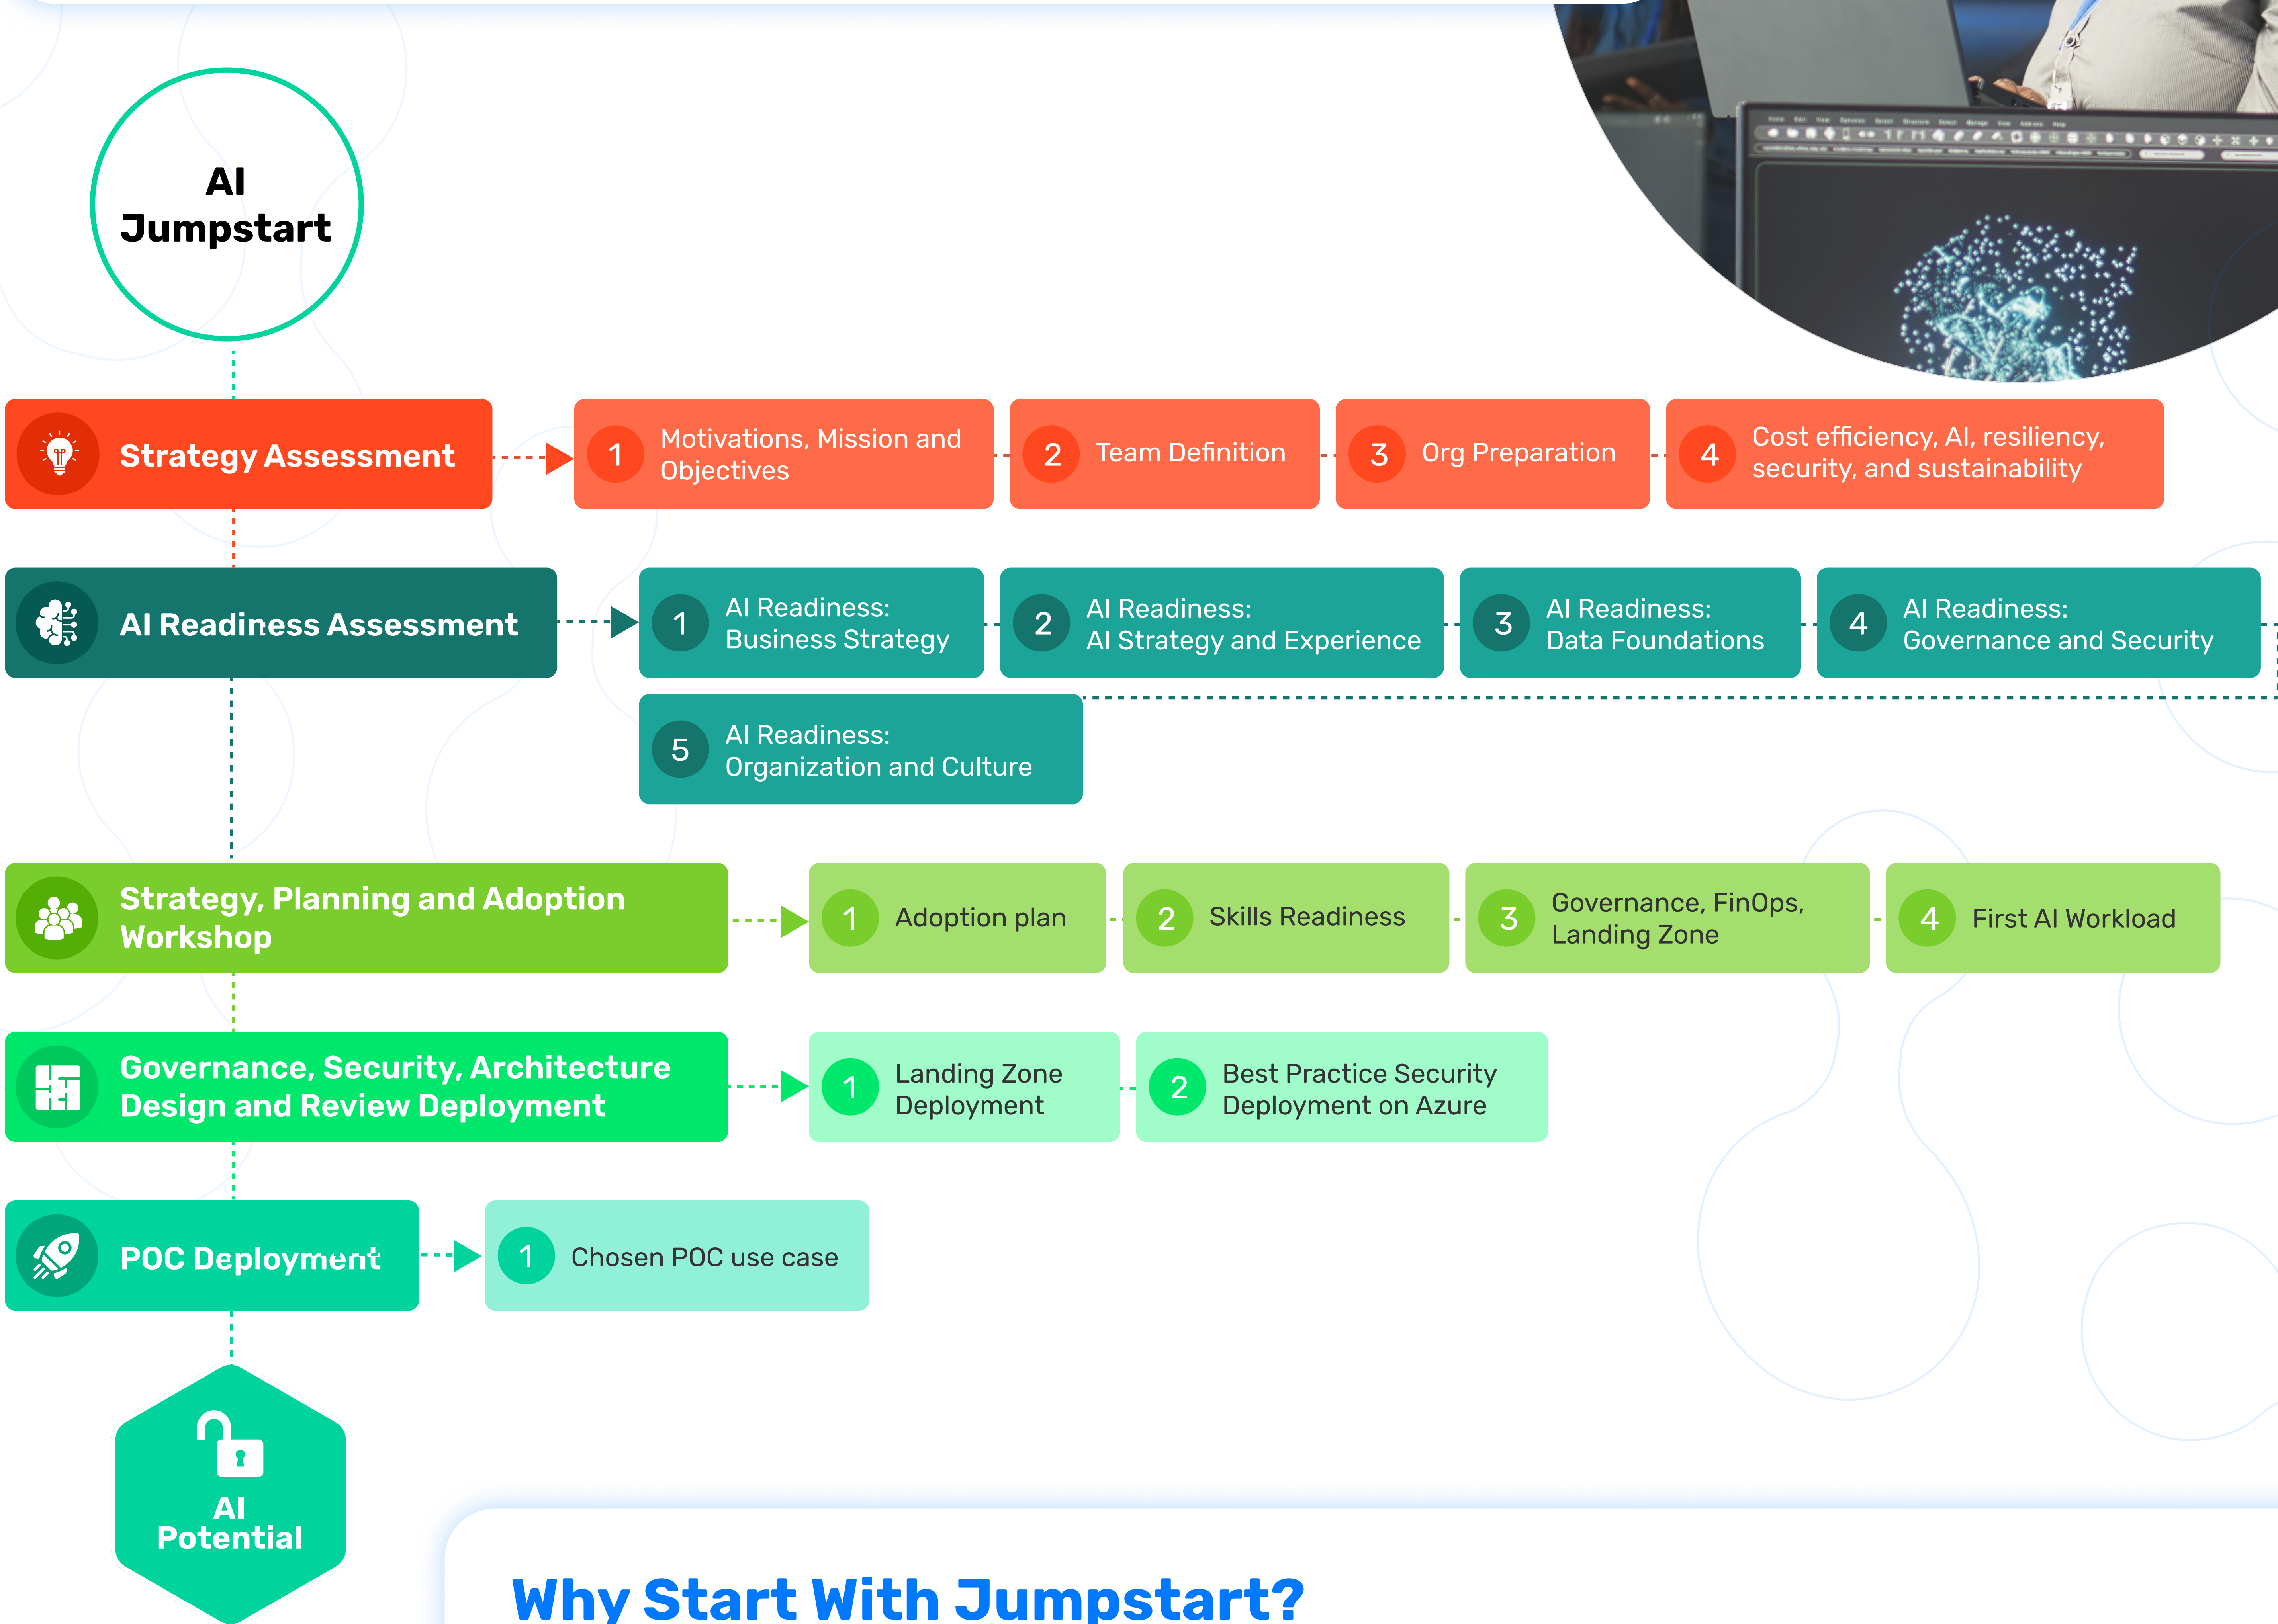

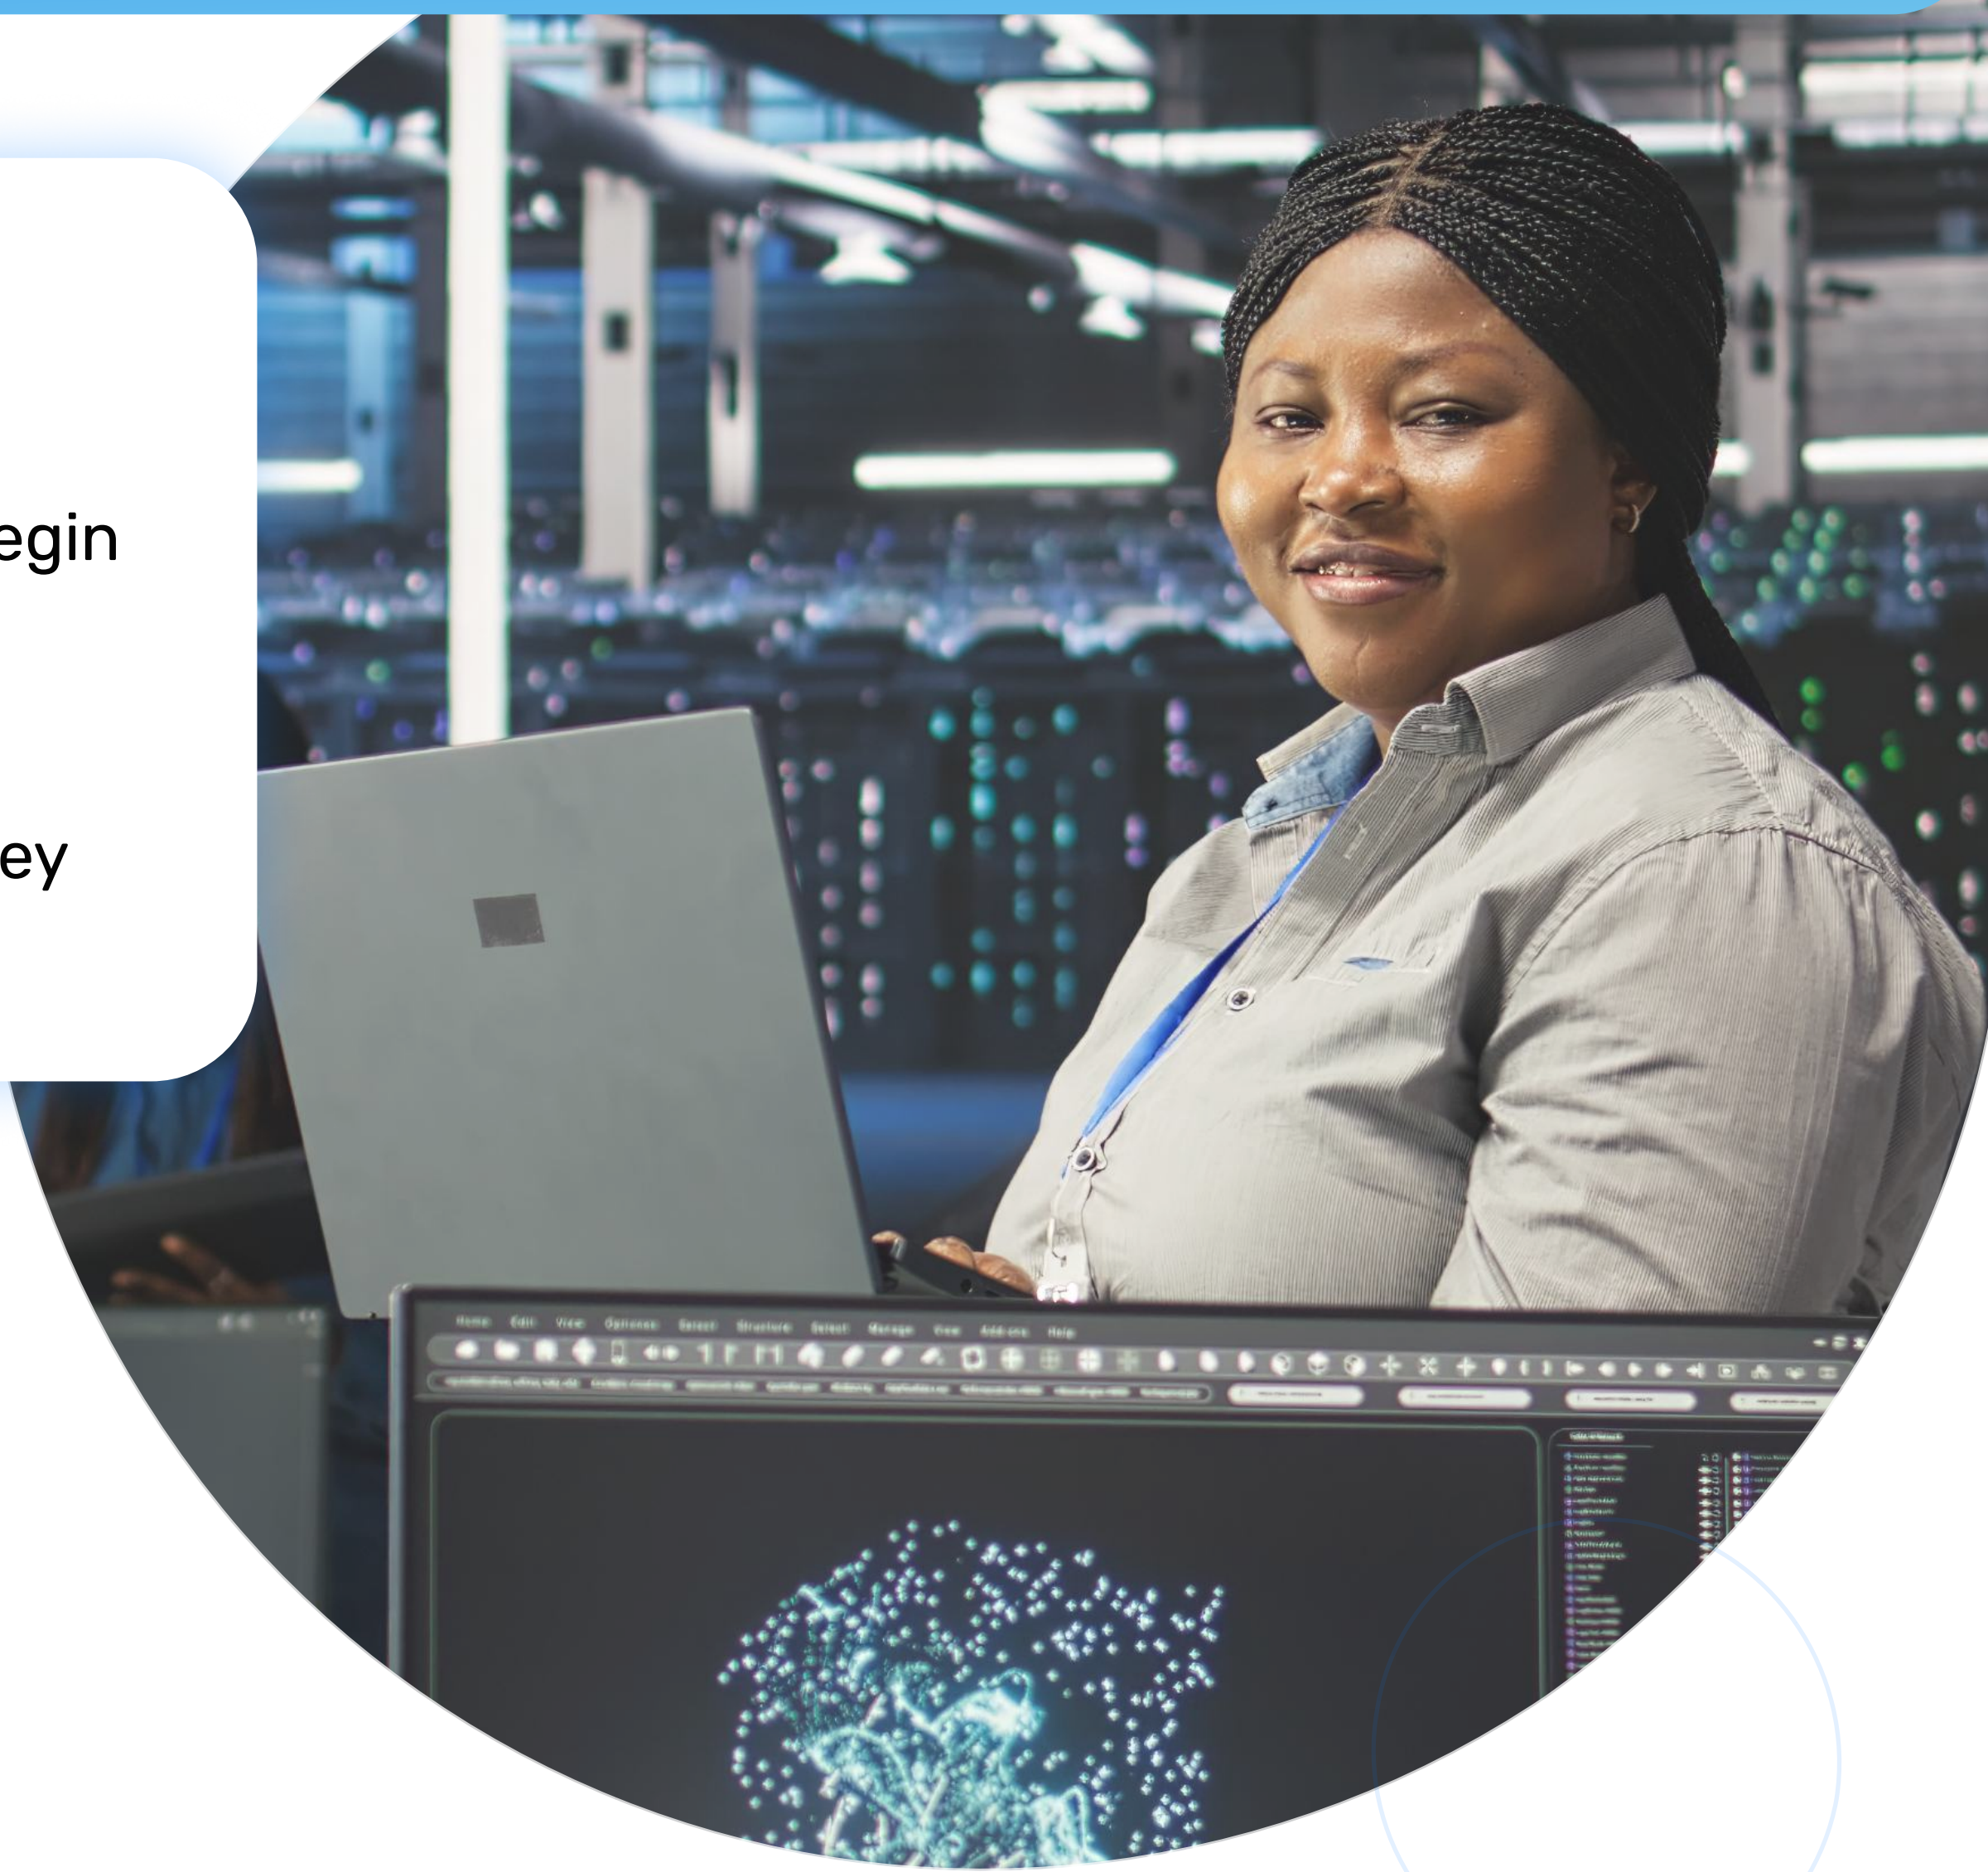

From Strategy to Scalable AI Workload —
In Just 3 Hours

What is AI Jumpstart?

Azure AI Jumpstart is a high-impact, low-friction engagement that helps businesses confidently begin their AI transformation. In just 3 hours, Braintree will work with your team to assess your readiness, identify AI opportunities, and deliver a clear, secure, and strategic roadmap to implementation.

Whether you're AI-curious or already experimenting with Copilot, this program fast-tracks your journey from **vision to value**.

Why Start With Jumpstart?

- AI transformation doesn't need to be overwhelming – it needs to be **intentional, secure, and aligned with business goals**.
- Rapid Readiness Without Complexity
- Tailored Strategy That Aligns to Business Goals
- Strategic Guidance and Partnership from Microsoft Experts
- Security, Compliance, and Cost Governance Built In
- A Proven Framework to Scale AI Responsibly

Key Deliverables

During your 3-hour AI Jumpstart, Braintree will deliver:

AI Readiness Assessment Report

A detailed evaluation of your data estate, digital maturity, security posture, and readiness to adopt AI responsibly and effectively.

Prioritised AI Roadmap

A customised roadmap highlighting strategic AI use cases matched to your goals, resources, and timeline.

Proof of Concept (POC)

A working AI prototype deployed within your environment to validate feasibility, technical fit, and expected ROI.

Governance & Architecture Review

Microsoft-compliant best practices for deploying AI safely, including identity management, data governance, and architecture.

Microsoft Well-Architected Framework Alignment

Ensure your AI solutions are scalable, secure, cost-effective, and performance-optimised across your Azure environment.

The Jumpstart Journey

Phase 1:
AI Readiness

- ✓ Assess digital & data maturity
- ✓ Identify AI blockers & enablers
- ✓ Establish governance benchmarks

Phase 2:
Strategy & Planning

- ✓ Align AI use cases with business needs
- ✓ Prioritise opportunities by impact & feasibility
- ✓ Build a phased roadmap

Phase 3:
POC Execution

- ✓ Choose 1 priority use case
- ✓ Build and demo in a secure sandbox
- ✓ Capture stakeholder feedback, measure ROI

Phase 4:
Adoption & Scaling

- ✓ Recommend security, governance & platform adjustments
- ✓ Align to Microsoft's Cloud Adoption Framework & AI Ethics
- ✓ Prepare roadmap for long-term AI growth

Ideal for Organisations That:

- ✓ Are exploring or expanding Microsoft Copilot or Azure OpenAI
- ✓ Have fragmented data and no clear AI strategy
- ✓ Need executive alignment and stakeholder buy-in
- ✓ Require secure and compliant AI adoption pathways
- ✓ Want to move fast without overcommitting to costly pilots

Questions We Explore Together

- ✓ Do you know where to start integrating AI into your business processes?
- ✓ Which use cases do you envision for AI in your organisation?
- ✓ What are the current blockers to AI adoption?
- ✓ How confident are you in your organisation's ability to secure AI systems?
- ✓ Would a short-term POC help validate AI's impact before scaling?

Outcome? You Leave With:

- ✓ A clear vision of where AI fits in your business
- ✓ A documented roadmap to scale
- ✓ A working proof-of-concept
- ✓ The confidence to take the next step

Built on Microsoft's Cloud & AI Ecosystem

Microsoft 365 Copilot

Azure AI & OpenAI

Microsoft Entra ID (Security & Identity)

Azure Synapse, Purview, and more
